POSITION STATEMENT: Aluminum and Steel Wheel Repair & Reconditioning

Genesis Motor America does not approve the use of reconditioned steel or aluminum wheels on any Genesis vehicle. Reconditioned wheels may not meet the same standards as newly manufactured wheels. Reconditioned wheels may contribute to poor performance and compromise safety.

Post collision wheel inspection must be performed on all wheels with special attention to wheel(s) subject to the impact zone.

Genesis Motor America only recognizes steel or aluminum wheel repair that is limited to surface treatment that restores cosmetic appearance of the finish coating.
